

2021.11.29 News Release

Orders received for “Micro Display Encapsulation System by Wafer”

We, AIMECHATEC, Ltd. (Head Office: Koyodai, Ryugasaki-shi, Ibaraki-pref. President: Isao Abe) are pleased to announce that we received orders for full system line of “Micro Display Encapsulation Process by Wafer” from several customers of Major Display and CMOS Manufacturers.

Micro Displays are adopted mainly for VR / AR / MR, etc. as Display to embody Virtual Reality, and have been applied in a wide range of field such as HUD (Head Up Display) for In-Vehicle, etc. recently.

We have been proposing Inkjet micro-level coating technology as one of our Core Technologies and new nano-level Vacuum Assembly System, Curing Equipment, Inspection Equipment, Handling System, etc. as One Stop Solution. As the result, we have received orders of Micro Display Encapsulation System which are highly evaluated as the system to realize high yield.

This system has been currently planned to be purchased by many customers and expected to become the key-business of our Inkjet Solution.

We will continue to contribute to the society by improving convenient and affluent lifestyle through our technological innovations for manufacturing processes.

Your continued kind support to our company is highly appreciated.
